

# EYFS Maths: Separating a Group of Three or Four Objects in Different Ways

## Home Learning Challenges

Play a number game while you have a snack. Count out four small items of food, such as strawberries, and place them on to a plate. Then, give some of the strawberries to a grown-up to put on their plate. How many strawberries do you have? How many does your grown-up have? How many altogether?

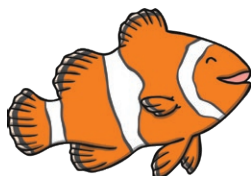

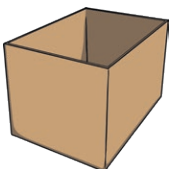

Have a building challenge using four building bricks. Use your building bricks to build a model. Can you make a different model using the same number of bricks?

Play a hide and seek game using three soft toys. Close your eyes and ask a grown-up to hide the toys around the room. Open your eyes and find the toys. How many are there altogether? Then, you can hide the toys for your grown-up to find. Can they find them all?

Use a piece of blue material to create an under the sea scene. On small pieces of paper, draw four pictures of fish to swim around your sea. Move the fish to different places and then count how many there are altogether.

Use two empty cardboard boxes as pretend buses. Collect four small toys to ride on the buses. How many toys are on each bus? How many toys altogether?

Ask a grown-up to find three of the same coin, such as three 10p coins. Turn the coins so that you can see the Queen's face on each one. How many coins do you have? Now, turn some of the coins over. How many are showing the Queen? How many are up the other way? How many altogether?
