

Did you know??

The recommended age for Skype is 13

Skype has strict security measures however they are based on the date of birth provided by the end user when creating a profile, so it is very important to enter the correct information

BENEFITS:

The pros of this app are:

- You can speak to friends via messenger, video or voice calls
- It's free!
- It can be used on your phone, ipads/tablets and computers

The E-safety tips are detailed ways to stay safe on Skype:

- ✓ Only allowing people in your contact list to contact you using Skype, including voice and video calls, chat messages and sharing screens.
- ✓ Hide your age, date of birth and gender on profile pages, so others cannot see this information.
- ✓ Hide yourself from search results unless someone uses your exact match by Skype Name or email.
