

Did you know??

The recommended age for Roblox is 10+

Roblox allows parents to have their own log in so they can oversee how you use it and check that you are being kept safe.

BENEFITS:

The pros of this game are:

- You can create your own game as well as play games with others
- You can create your own avatar and explore the game

ESAFETY TIPS from ROBLOX:

Under Age 13 Whitelist Chat

This is the preferred mode for parents looking for the ultimate in online safety. This option limits what members can say or see to a specific list of pre-approved words. When a user under the age of 13 signs up with their correct birth date, they are automatically put in this mode. Parents may transition their child to the next mode via the account settings.

Age 13 and Over Blacklist Chat

This mode allows members to type their own messages when communicating with other members. However, every message that is typed first goes through a filter that blocks inappropriate words and phrases. ROBLOX's adaptive filter also learns to decipher and catch codes or other methods that members might use to bypass the system.

CAUTION!!

There has been many recent concerns raised by parents from the ESafety Questionnaire to children discussing it in school. This game does allow users to comment and message others and from reading many reviews from the websites below the moderation of this site does seem very poor. If you have any concerns about this game then please speak to an adult and stop playing it.
