

At Flash Ley, our vision is to give children a Science curriculum which enables them to explore, discover and investigate the world around them, confidently, so that they have a deeper understanding of the world we live in. To achieve this it involves exciting, practical hands on experiences that encourage curiosity and questioning.

The children, staff, parents and governors think Science in our school is good when...

- Everyone feels confident, **inspired** and **excited** to **discover** new things together.
- Children's **interests** raise **questions** that lead the learning.
- We are **challenged** to 'think and do' to **investigate** real answers to mysteries in a real life context.
- We feel it is alright to make mistakes because we **learn** from them.
- We can **use** what we've learnt and know what we want to learn next.
- We can **use** what we've learnt and know what we want to learn next.

We expect to find some of these every time Science happens:

- children inspired and excited to discover
- children's questions
- challenge to investigate
- learning from mistakes
- working as the avengers
- outside and inside links
